## (54) DISPLAY DEVICE

## (57)Abstract:

**PROBLEM TO BE SOLVED:** To provide a display device using an electroluminescent element capable of detecting the quantity of moisture permeated in a sealed space after being formed into a panel.

**SOLUTION:** The display device comprises a glass base plate (10), an electroluminescent element (30) formed to a display area on the base plate, a sealing member (20) adhered to the base plate by an adhesive (21), covering the electroluminescent element, and an indicator (50) changing color by absorbing moisture arranged to the area excluding the display area. The indicator is arranged so as to surround the display area.
